Task 1 — Branded Social Media Kit

Concept: RAID branded social media kit featuring multiple promotional layouts, consistent branding, product messaging, and a QR-code call-to-action.

Professional summary: Raid is a fictional sport identified clothing line and accessories, showing its mantra of leaning towards supporting women in sports and awareness in the month of October and its African origin.

Process: Developed a cohesive branded social media kit for RAID, consisting of multiple promotional layouts designed for digital engagement. The designs maintain a consistent visual identity through the use of a unified colour palette, typography, brand placement, imagery, and call-to-action elements. The project focused on creating visually engaging content that could be adapted across different social media formats while maintaining brand consistency and recognition.

Task 2 — AI-Assisted Event Flyer

Concept: Afro Xella 2026 Festival promotional flyer with accompanying ticket designs.

Professional summary: Afro Xella is a fictional celebration of African music and lifestyle.

Process: Designed a promotional campaign for the Afro Xella 2026 Festival, combining event information, photographic imagery, decorative graphic elements, ticket information, and strong promotional messaging. The design applies visual hierarchy to guide the viewer through the event title, date, venue, ticket information, and call-to-action. Supporting ticket designs were also developed to create a consistent visual identity across the event's promotional materials.

Task 3 — Mini Brand Identity Package

Concept: Poil Hair Essentials brand identity package.

Brief and Process: Developed a mini brand identity for Poil Hair Essentials, a fictional hair-care brand. The project included the development of a logo concept, supporting logo variations, a defined colour palette, typography selections, and visual applications. The brand sheet demonstrates how the selected visual elements work together to establish a cohesive and recognizable identity suitable for beauty and personal-care applications.
